BlackRock Aquila Life Balanced Fund S3 ACCU GBP

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at 31 May 2025. All other data as at 23 June 2025.

Fund overview

This fund invests in UK and overseas equities and British government fixed income and index-linked gilts. This helps to meet the aim of providing returns in excess of inflation whilst the holdings in gilts and index-linked gilts provides stability and helps to diversify risk within the fund. The fund has approximately 55% invested in UK equities, 20% in overseas equities and 25% in British government fixed income gilts and index-linked gilts.

Capital at risk

The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

Key risks

All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events. Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.

Securities lending

In principle, all funds may participate in securities lending. BlackRock, acting as an agent, currently lends securities on behalf of certain funds with the objective of generating incremental returns for the funds while maintaining a low level of risk.

Should a particular fund undertake securities lending, it will receive 62.5% of the income generated by this activity and the remaining 37.5% will be received by BlackRock as the securities lending agent. The fact that BlackRock receives a portion of the fee generated from the overall securities lending income does not increase the costs of running the fund. Securities lending involves risk such as that of counterparty default. As an additional safeguard in the event of a counterparty default, BlackRock, Inc. provides the fund with an indemnity to cover losses associated with borrower default — in the event of a default, if a shortfall exists between the proceeds of the sale of the collateral and the cost to repurchase loaned securities, BlackRock reimburses the fund in full under the terms of the indemnity.
